

RsbHal - Hardware abstraction library

Comprehensive abstraction at the software level for optimal and flexible connection of any hardware.

Standardized interface
Integrated documentation
Extendable
Modular / Flexible
Diagnosable
Configurable
Tested
Future ready

 **RSB Solutions**
Automation Studio libraries

A Offering a more dynamical way to access hardware during runtime

Extended access

B Offer more extensive diagnostic options

Diagnosis

B Simple abstraction of any modbus device.
Configurable during runtime, with initialization list and definable cycle times.

Modbus RTU/TCP
